Importance: High

Hi, folks.

(Dom, you'll see a missed call from me. Give me a call when you have a second).

While I was talking with our Acting RA's exec asst, I asked if the Acting RA was aware of the developing issue regarding Chemours. I was referring to the TSCA/Water issue, but she thought I was talking about the one noted below which has to do with an assertion regarding migration from WV into Kentucky (see attachment). Just wanted to make sure you were all aware of both.

Thanks,
Cathy

I received this email relating to a request for information from Robert Bilott relating to the down-river migration of PFOA from the Washington Works Plant in West Virginia into Kentucky. The request was not addressed to our region, but I wanted to bring it to your attention.
